

## Events

The Society hosts a number of events, including National Meetings, usually held on a Wednesday or Saturday, Local Centre Meetings, held around the UK, and Special Interest Group Meetings for those who are interested in particular areas of meteorology.

Don't forget that you can add your attendance at our meetings to your personal CPD record with just one click! When looking at meeting information on our website you will see a large orange button that says 'Create CPD Record from this event'. You will need to ensure that you are logged in as a member at the time, then simply click and then save. These can be used in your formal CPD record for a professional body (such as RMet or CMet).
