

## Atmospheric Electricity

[Register an interest](#) <sup>[1]</sup>

[Email the Atmospheric Electricity group](#) <sup>[1]</sup>

The group will capture a growing resurgence in UK atmospheric electricity work, and will cover a wide range of topics including lightning and thunderstorms, and the influence of aerosols and raindrops – looking at ground based and atmospheric detection.

This work has largely emerged from the UK atmospheric science community, such as at the Universities of Bristol, Bath, Manchester, Oxford and Reading, but also earth science activity around volcanic lightning, the meteorological instrument manufacturer Biral and the Met Office activity in the lightning detection and space weather areas.

## Upcoming meetings

- Friday, June 12, 2020 - 19:30 -  
[UPDATED - The storm of 14/15 January 1968: People, the Weather and Public Perception](#) <sup>[3]</sup>
- Saturday, June 13, 2020 - 10:00 -  
[UPDATED - The weather, measur'd: 400 years of meteorological instrument technology](#) <sup>[4]</sup>
- Monday, June 29, 2020 - 08:00 -  
[VIRTUAL| Student & Early Career Scientists Conference 2020](#) <sup>[5]</sup>
- Monday, June 29, 2020 - 08:00 -  
[TEST - Virtual Student Conference 2020](#) <sup>[6]</sup>
- Wednesday, July 1, 2020 - 08:00 -  
[UPDATED - Atmospheric Science Conference 2020](#) <sup>[7]</sup>
